Nshield connect xc base installation guide.

XPS Driver Release Notes The release notes are for the XPS Card Printer Driver uses Microsoft XPS print technology to support card production using an SD160, SD260, SD260L, SD360, SD460, CD800, CL900, CD820, CE840 & Artista CR805 systems. XPS Card Printer Driver User's Guide The Card Printer Driver uses Microsoft XPS print technology to support printing from currently available applications. The XPS Card Printer Driver User's Guide contains: Information about the Printer Driver, XPS driver installation, Driver management tasks, Card design tasks, Troubleshooting library information, SD260L, SD360 and SD460 Printer Quick Install Guide Quick Install Guide for SD260L, SD360 and SD460 Printers, SD260L, SD360 and SD460 Installation and Administrators Guide SD Installation and Administrators Guide SD460 SLM Laminating System Quick Install Guide The Quick Install Guide for SD460 Card Printer and Laminator System, SD260L, SD360 and SD460 User Guide This manual provides user information for the SD Series Card Printers. The manual includes: An overview of printer components and options, and a description of the system label. How to use the printer, including how to power the printer on and off, how to use the front panel and LCD menus, card processing basics, how to print a test card, and how to load and replace supplies. How to perform routine maintenance and troubleshooting tasks. SD Printer Repackaging for Shipment Repackaging Guide for SD Printers Rev B. SLM/CLM Laminator Repackaging for Shipment Repackaging Guide for SLM/CLM Laminator. Make sure you back up your Apache configuration files before making any changes. If you are replacing an existing certificate, do not delete the existing certificate or private key files in case you need to revert your previous configuration. Never share private keys files. If you plan on using the same certificate on multiple servers always transfer the private key using a secure method (e-mail is not considered a secure method of transfer). It is best practice to ensure that you have current and up to date Ciphers and Protocols to ensure the best security when deploying a new Private key and Server Certificate. Make sure you run the SSL Server Test at the end of the installation process to check your certificate configuration against SSL/TLS Best Practices. For more information on SSL/TLS Best Practices, click here. The installation is in four parts: 1) Copy the certificate files to your server 2) Configure the Apache server to point to certificate files 3) Test the configuration was successful 4) Restart the Apache server Part 1 of 4: Copy the certificate files to your server 1. Download the certificate files. You will obtain a .zip file containing: ChainBundle1.crt ServerCertificate.crt 2. Copy the two files into the wwwroot\conf\ directory (which is most likely, "c:\Program Files\Apache Software Foundation\Apache2.2\conf\"). Part 2 of 4: Configure the Apache server to point to the certificate files 1. In order for Apache to run with SSL/TLS, you must alter the configuration files and restart the server. Note that Vista users must turn off User Account Control in order to save the new configuration files. In the httpd.conf file, change the following lines by removing the leading # sign in order to uncomment the line: #LoadModule ssl_module modules/mod_ssl.so and #Include conf/extra/httpd-default.conf So these two lines should now appear as: LoadModule ssl_module modules/mod_ssl.so and Include conf/extra/httpd-default.conf apacheectl configtestsudo apacheectl restart Your SSL/TLS Certificate should now be installed. If you have any questions or concerns please contact the Entrust Certificate Services support department for further assistance. Hours of Operation: Sunday 8:00 PM ET to Friday 8:00 PM ET North America (toll free): 1-866-267-9297 Outside North America: 1-613-270-2680 (or see the list below) NOTE: It is very important that international callers dial the UITF format exactly as indicated. Do not dial an extra "1" before the "800" or your call will not be accepted as an UITF toll free call.
